

- Energy & Environment
- Oil & Gas
- Drive & Control

Introduction

Established in 1997, Narvan Arra's prime objective and the vision of it's Managing Director Kamran Kavian, was to inspire a quality culture within Iran's industry and infrastructure. This was driven by the need for systems engineering together with quality products and advanced project management concept, to deliver sustainable results.

Today we are able to meet the varied requirements of industrial, infrastructure and environmental projects, through forming workable partnerships between local and leading international companies, ensuring the expertise in each key area essential to project fulfilment.

Whether engineering, procurement, management, integration or implementation, initiation and facilitation is our proficiency.

Our approach is based on sustainability, and adding value.

Mission

We are committed to offering systems and solutions from the most reliable and reputable sources for a vast coverage of industry sectors; e.g. Hydro Power & Water, Oil & Gas, Petrochemical, Automotive, Steel, Marine & Offshore, to assist our clients achieve quality and long term profitability in their overall pursuits.

In parallel, we believe it is essential to balance both the demands of industry and its impact on the environment, and at every stage of implementing projects this belief is put into action. This in turn has positive impacts for industry through increased efficiency and sustainability of industrial plants.

Narvan Arra has, through lobbying, had a positive effect on Iranian governmental organizations and other companies working within Iran, with regard to environmental impacts of infrastructure projects.

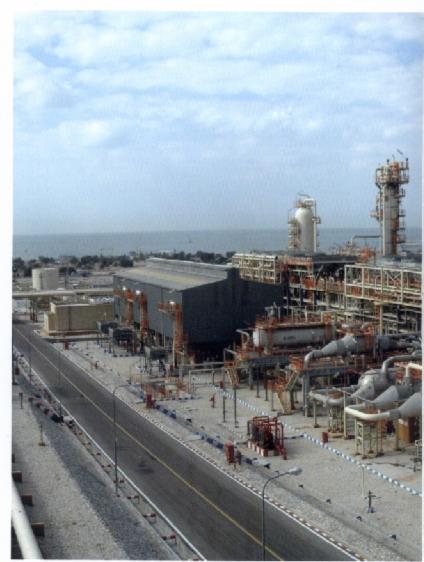

Our Values

- Commitment to our customers and clients.
- Commitment to the environment.
- Commitment to our communities.
- Commitment to our business partners.
- Commitment to our working teams.
- Commitment to delivering quality.
- Commitment to continuous added value.

- Marketing and Sales.
- Commercial and Contractual.
- Technical and Engineering.
- Project Management and Coordination.
- Logistical Support.
- Training and Transfer of Technology.
- Maintenance and After Sales Support.

Quality Management System

Narvan Arra was the first company in Iran to align with international standards, and the first Iranian service company to be granted ISO9001 quality management and assurance system (version 2000), acknowledged by SGS.

Related Companies

Narvan Arra has strategic associations with companies located in the region, as well as Europe, to facilitate the ever-expanding range of services and business sector demands by the market in Iran.

Located in UAE Commercial and Banking Facilities

Located in Kish Island Free Zone Import and Export Facilities

Located in United Kingdom Contractual, Management and Banking

Business Units

Narvan Arra's three business units focus on a core of expertise in specific industry sectors as follows:

Energy and Environment

Narvan Arra have been active in the implementation of various infrastructure projects in the fields of Hydro Mechanical and Hydro Power, River Engineering, Environmental Monitoring Systems, Water Resources Management and Power Planning Studies.

Oil and Gas

Narvan Arra have facilitated its clients demands in undertaking and implementing projects by sourcing and supplying raw materials, components and machinery to industries with a specific focus on the Oil, Gas and Petrochemical sector.

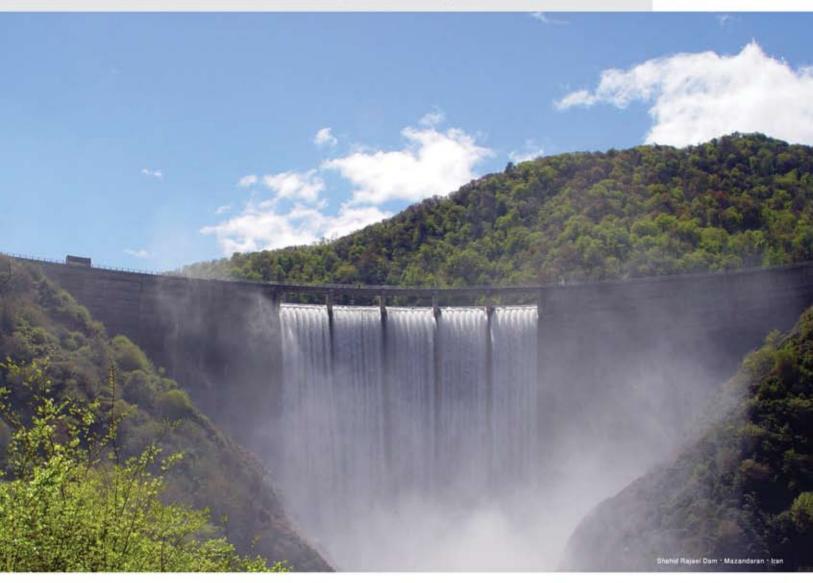

Drive and Control

Narvan Arra is the Sole Distributor and Service Partner for the entire Bosch Rexroth Group, providing high quality equipment and components, modules or complete system solutions in Hydraulics, Pneumatics, Service Automation, Electric Drives and Controls, Linear Motion and Assembly Technologies.

A Proven Track Record in Major Dam Projects

Energy & Environment Oil & Gas

Drive & Control

Introduction

Narvan Arra have a wealth of knowledge and expertise in facilitation and coordination of projects from design to implementation and have managed many infrastructure projects in the energy and water sectors in collaboration with our local and international partners.

Narvan Arra have been involved in the initiation, coordination and completion of projects and comprehensive studies in the areas of:

- Hydro Electric Power Plants.
- Dams and Hydro Mechanical Equipment.
- Hydraulics and Electronics in Civil Engineering Projects.
- Environmental Monitoring Systems.
- Reverse Osmosis Desalination Plants.
- The Mining industry.
- System Engineering, Consultancy and Project Management.

Commitment to the Environment

Narvan Arra was the first to establish ecological rehabilitation projects for two great and historical rivers of the region Karun and Dez, which together spans over 1,300 Km. This has led the way for similar approaches to other river systems in Iran.

The use of monitoring technologies has allowed us to parameterise the extent of damage caused by human effect, paving the way for rehabilitation. The first step is to identify the problem.

The Karun River is of great ecological and historical significance.

We provide innovative environmental solutions.

Global technologies working on a local level

Energy & Environment-Services

Narvan Arra's Energy & Environment unit incorporates the exploration of infrastructure projects, identifying and developing through access to a broad information network, gained as a result of years of successful project implementation.

Implementation and completion of projects is achieved to the highest standards through our partnership with world-class companies.

Management of post project services continues after project completion, supporting the client throughout the warranty period and where necessary, beyond.

Local Demand - Global Solutions

Energy & Environment

Oil & Gas

Drive & Control

Introduction

With Iran's huge reservoirs of oil & gas and strategic geographical location, a wide range of development and renovation activities have started to elevate Iran's investment in the energy sector.

Narvan Arra's Oil & Gas business unit is able to meet the specialised requirements of companies involved in major Oil, Gas and Petrochemical developments; delivering quality products alongside project-bespoke services, thereby ensuring full satisfaction to both project owner and customer.

Based on the specific requirements of a project, and in order to provide the full range of expertise, equipment and services; we build teams of experienced suppliers/contractors, design and engineering companies, bankers, financers and lawyers to meet the needs.

Oil & Gas - Applications

Narvan Arra's Oil & Gas unit has been involved in the procurement, installation, training, commissioning and provision of warranty services to the following applications within Oil, Gas & Petrochemical sectors:

- Refineries.
- Petrochemical Plants.
- Oil & Gas Pipelines.
- Tank Farms and Terminals.
- CNG Technology.
- Gas Boosting Stations.
- Storage Facilities.
- Offshore Platforms.

Oil & Gas - Products

Narvan Arra is positioned to provide a wide range of high technology equipment for the following applications:

Products Applications	Pipes & Tubes	Sheets & Plates	Valves	Flanges & Fittings	Gaskets & Insulation	Pumps	Reciprocating Gas Compressors	Steam Turbines	Storage tank Equipment	Loading Arms	Instrumentation
Refineries	•	•	•	•	•	•	•	•	•		
Petrochemical Plants	•	•	•	•	•	•	•	•	•

The Global Leaders in Drive and Control, The Bosch Rexroth Group

- Energy & Environment
 Oil & Gas
- Drive & Control

Bosch Rexroth, a Drive and Control company, belong to Bosch Group. The group had a turnover of 45.1 billion Euros in 2008.

Narvan Arra - Bosch Rexroth partnership has progressed since its commencement in 1997, following on from four years of consultancy and project management initiated in 1993 with Narvan Arra's Managing Director Kamran Kavian.

In 2002 Narvan Arra were appointed Sole Distributor & Service Partner for the entire Bosch Rexroth group covering each and every business unit:

- Electric Drives and Controls.
- Hydraulics Industrial and Mobile.
- Linear Motion and Assembly Technologies.
- Pneumatics.
- Service Automation.

Quality Management

Our focus and dedication is to offer quality products and solutions. Narvan Arra have recived ISO 9001:2008 certificate.

We are committed to transferring technology and Systems Engineering for a broad range of industry sectors in Iran.

Narvan Arra delivers the highest standard of Bosch Rexroth Group in many applications founded on excellent customer services, ethics and environmental commitment.
